Block- Baliapal
Dist- Balasore

Sri Sudhir Kumar Nayak is a poor farmer having 2 Jersey Cows. A calf was born on 19/04/2010 from CBJ cow as the first calver. The mother was yielding 10 Litres per day. The birth weight of the calf was about 30 Kg. It was difficult for Sudhir Nayak for taking care of the calf due to financial crisis. Finally he was fortunate to include the calf under Calf Rearing Scheme during the year 2010-2011. After induction the calf was insured by the Insurance Company, dewormed and vaccinated against Theillera. Calf feed was supplied by the MPCs Analdiha under Baliapal Block at regular interval for proper nutritional maintainances and regular health check up was done by the concerned LIs and VAS.

Due to proper nutritional maintainances, regular health check up, the heifer came to heat at 14 months of age and the body weight increased to 245 Kgs. Now the calf is 6 months pregnant. The owner was very happy and was sure that the milk yields will definitely increase. He was also cultivating fodder in his own field and was thankful to the Calf Rearing Scheme.
